

The Future of Health Begins With You

The *All of Us* Research Program is working to create a healthier future for generations to come. We're asking one million people to join us and help lead the way. We will be launching across the country in the spring. This holiday season, talk to your family about *All of Us* and discuss the many reasons to join.

Your Questions Answered

What is precision medicine?

Precision medicine is health care that is based on you as an individual. It looks at things like where you live and your family health history. If someone does get sick, precision medicine may help health care teams find the treatment that will work best.

All of Us Update

8,000
Participants

More than 8,000 people are now enrolled in the *All of Us* Research Program as part of our beta phase. We're making improvements based on your feedback. We look forward to opening enrollment across the country this spring.

Your Family Health History

Knowing your family's health history can help save your life and the lives of those you love. The U.S. Surgeon General has put together a guide to help you organize your family's health information.
